whiz®
freedom
for when nature calls

www.whizfreedom.com

Worlds first and No.1 hydrophobic,
anti-bacterial and eco-friendly urine director.

Allowing women to wee standing or sitting, indoors or outdoors, whenever they choose. With a Whiz Freedom dirty public toilets, squat loos or no loos (!) are no longer a problem.

Whiz Freedom For when nature calls

The Whiz Freedom is the perfect companion for every woman who loves the outdoors. This ingenious device lets women wee wherever a man could - standing or sitting - just hold it against your body and let nature and gravity do the rest.

A number of UK festivals have as a result of intervention by Health and Safety officials banned the use of disposable Urine directors. The Whiz Freedom with its hydrophobic, anti-bacterial and eco friendly (re-usable) qualities has been granted permission to trade at all the festivals.
